THE UNIVERSITY OF NEWCASTLE AUSTRALIA

**School of Computer and Information Sciences**
**Semester 2, 2026 - COMP2240/COMP6240 - Operating Systems**

# Assignment 3 Marking Breakdown

## A - Correctness of Algorithms (70%)

| | |
|---|---|
| Implementation of Round Robin Scheduling | **20%** |
| Clock with Fixed Allocation and Local Replacement | **50%** |

## B - Code Form & Output (10%)

| | |
|---|---|
| Code structure, Readability, Consistency, Appropriate Commenting<br>Is the output presented in the same manner as the sample? | **10%** |

## C - Report (20%)

| | |
|---|---|
| Length, Format, Does it satisfy the report specification? | **20%** |

## Deductions

Deductions will be applied for invalid results, incorrect submission standards, failure to compile, failure to execute to completion, failure to correctly follow specifications.

If your assignment is not prepared and submitted following the specification and instructions therein, you could lose most of your marks despite your algorithms being correct.

Assignments submitted after the deadline will have the final result reduced by 10% of the maximum possible marks per day late. A '*day*' begins at 12:00 Midnight, and once this time is passed, the penalty for the whole day is applied (*within reason; there is a grace period immediately after the deadline*).
